

Environmental

Steel Spun Dished Ends

Sustainable, Reliable, Affordable

Kingspan General Steel Products (GSP)

Has been manufacturing dished ends for over 30 years.

Offering a wealth of experience & knowledge gained through product development and manufacturing experience

GSP provides customers with on-time delivery, high quality finish and competitive pricing.

These advantages to customers is backed up with an engineering and technical support service and skills, quality systems and customer service support.

The range of dished / doomed ends are manufactured from

DD11 mild steel S275 Structural Steel BSEN 10025 in 5mm & 6mm plate thickness in accordance with BS500:1997

Manufactured in a range of specifications (see table below) the dished doomed ends are suitable for **agricultural** and **commercial applications** such as **slurry tankers** or **oil tankers**.

Outside Diameter		Crown Radius		Inside Knuckle Radius		Depth of End	Weight	Plate Thickness	Capacity of Dished End	End Code
